

Metabolomics

Metabolomics will publish a substantial share of the most significant current research in the areas of: the development of various technology platforms for metabolomics, metabolite target analysis, metabolic profiling, and metabolic fingerprinting; improvements in data storage, curation and analyses; comparative integrated studies with transcriptomics and proteomics including within a systems biology context; and the application of metabolomics within man, animals, plants and microbes. *Metabolomics* will be a broad-based journal that is indispensable to those whose work has implications of near-term practical benefit.

TYPES OF MANUSCRIPTS

Review articles, original articles, short communications, letters to the Editor and book reviews will be considered for publication. Please contact the Publisher for full details.

ONLINE MANUSCRIPT SUBMISSION

Kluwer Academic Publishers now offers authors, editors and reviewers of *Metabolomics* the use of our fully web-enabled online manuscript submission and review system. To keep the review time as short as possible, we request authors to submit manuscripts online to the journal's editorial office. Our online manuscript submission and review system offers authors the option to track the progress of the review process of manuscripts in real time. Manuscripts should be submitted using the online mechanism at: <http://MEBO.edmgr.com>

The online manuscript submission and review system for *Metabolomics* offers easy and straightforward log-in and submission procedures. This system supports a wide range of submission file formats: for manuscripts - Word, WordPerfect, RTF, TXT, and LaTeX; for figures - TIFF, GIF, JPEG, EPS, PPT, and Postscript. PDF is not an acceptable format.

NOTE: In case you encounter any difficulties while submitting your manuscript online, please get in touch with the responsible Editorial Assistant by clicking on "CONTACT US" from the tool bar.

Authors are requested to download the Consent to Publish and Transfer of Copyright form from the journal's website. Please send a completed and duly signed form either by mail or fax to the Editorial Office of *Metabolomics*. Authors should still follow the regular instructions for authors when preparing their manuscripts (see below).

Metabolomics

STYLE OF MANUSCRIPTS

Manuscripts should be typed with double spacing on standard size paper. Spelling should conform to Webster's International Dictionary and System International (SI) units should be used throughout. Abbreviations should be kept to a minimum and be defined at first mention. Generic names should be used for drugs (brand names may be inserted in parentheses).

The title page should include a concise and descriptive title for the paper, the full name(s) of the author(s); the institutional affiliation of each author; the name and address of the corresponding author (including e-mail address, telephone and fax numbers); an abbreviated title; and any acknowledgment of financial or material support. This should be followed by the abstract page, summarizing in **bold** font 12, no more than 250 words the reason for the study, the major finding (with specific data if possible), and the principal conclusions, and providing 3-6 key words for indexing purposes. Emphasis of headings should follow these font styles: Introduction, font 14 bold; subheading, font 12 bold, and sub-heading, font 12 italics. The text of the report should then proceed as follows:

1. **Introduction.** Describe the background of the investigation, citing only essential references, and state the aim(s) of the study.

2. **Materials and Methods.** Give sufficient detail for future repetition. Describe new methods in detail; providing references and brief descriptions for previously published methods. Research on human subjects should indicate that ethical approval was obtained.
3. **Results and Discussion.** Present data in a single form. Emphasis should be on clear and precise presentation of results and their significance in relation to the aim of the investigation. Review the results of the study in the light of previously published work.
4. **Concluding Remarks.** Give a brief conclusion of less than 200 words.
5. **Acknowledgments.** Detail contributions, including technical help or other assistance, requiring acknowledgment but not justifying authorship in less than 50 words.
6. **References.** References should appear alphabetically. The reference list must be double spaced and should include: names and initials of all authors when there are six or fewer (when there are more than six authors, list the only first three followed by *et al.*), full title of the article, journal title abbreviated according to Index Medicus, year, volume number and page span. For reference cited from books, the chapter title should be followed by the names and initials of the editors, the book title, edition, place of publication, publisher, year and page span.

An Endnote style filter (Metabolomics.ens) is available.

References are to appear in Harvard style in text:

Jones (2003) or (Jones, 2003)

Jones and Smith (2004) or (Jones and Smith, 2004)

Jones *et al.* (2004), Jones and colleagues (2004) or (Jones *et al.*, 2004)

Multiple ones separated by a ','

Paper:

Oliver, S.G., Winson, M.K., Kell, D.B. and Baganz, F. (1998) Systematic functional analysis of the yeast genome. *Trends Biotechnol.* **16**, 373-378.

Book:

Jolliffe, I.T. (1986). *Principal Component Analysis*. Springer-Verlag, New York.

Chapter in Book:

Beecher, C.W.W. (2003). The human metabolome in Harrigan, G.G. and Goodacre, R. (Eds), *Metabolomic profiling: its role in biomarker discovery and gene function analysis*. Kluwer Academic Publishers, Boston, pp. 311-319.

Only accepted papers should be referenced; all other material should be referred to in the text as 'in preparation,' 'personal communication,' or 'unpublished observations' and should not be included in the reference list (see also Permissions). Authors are responsible for the accuracy of their references.

STYLE FOR ILLUSTRATIONS

All tables and illustrations must be numbered and referred to in the text, with appropriate locations indicated in the text margin. Tables should be typed with double spacing with a descriptive title and, if appropriate, units of numerical measurements included in the column heading. All lettering should be large enough to permit legible reduction. Axes should be labeled clearly; any other lettering should be kept to a minimum. Magnifications should be shown with scale bars. Color illustrations are acceptable, but authors will be expected to cover the extra reproduction costs (for current charges contact the Publishers). Suggested figure formats: TIFF, GIF, EPS, PPT, and Postscript. Files should be at least 300 dpi.

CONFLICT OF INTEREST

Authors should disclose any commercial or other associations that might pose a conflict of interest in connection with the submitted article.

PERMISSIONS

Materials copied from other sources must be accompanied by a written statement from both author and publishers, giving permission for reproduction. Permission in writing should also be obtained for citations of unpublished data, personal communications, and papers still in press. Authors are themselves responsible for obtaining permission to reproduce copyright material from other sources.

PROOFING

Please be sure to include your e-mail address on your paper. If your paper is accepted, we will provide proofs electronically. Your cooperation is appreciated. The proofread copy should be returned to the Publisher within 72 hours.

COPYRIGHT

It is the policy of Kluwer Academic Publishers to own the copyright of all contributions it publishes. To comply with U.S. Copyright Law, authors are required to sign a copyright transfer form before publication. This form returns to authors and their employers full rights to reuse their material for their own purposes. Authors must submit a signed copy of this form with their manuscript.

OFFPRINTS

The Journal does provide 50 free offprints and authors may order offprints using the form provided with the proofs.
